

GWALIOR , JULY 20 , 2015

To whom it may concern

Ms. Dimpal Rawat took industrial training as a Trainee Engineer from Fourth week of May to the Fourth week of July 2015.

Dimpal began by quickly familiarizing herself with the **Smart Controls** business systems. She enthusiastically took on basic task which were to give her learning experience of .NET. She took keen interest to learn all possible Applications that could be designed using .Net. Our project was all about to design a web based application which involved database management for accessing records of customers. This gave her a vast exposure in the field of ASP.NET and ADO.NET. Next, we took Dimpal's request to focus on the skills of downloading and printing files from database.

As emergencies and priority shifts arose, she was always the model of flexibility , patience , and exceeded our expectation in regards to taking every advantage of the **Smart Controls** knowledge-base and resources.

Dimpal is a joy to work with, a good researcher, problem-solver who takes pains to learn everything possible about a project's true value proposition before fixing bugs and developing new features. This young lady will always have projects competing for her.

Best Regards

S.K. Lokras

Director at Smart Controls India Limited.
